Re: United States Patent Application No. 10/566.167

Title: COMPOSITE FORM FOR STABILIZING EARTHEN EMBANKMENTS

Filed: 371(c) Date: January 27, 2006 Applicant: KALLEN, Michael Charles

This is a second transmittal of the amendment and response to the Office Action of March 11, 2008.

The first transmittal was sent on May 13, 2008. However, it appears that there was an interruption in transmission as the result of which it was received in two parts by the Central Fax Center - and as the result of which one page got scrambled or lost in the process.
